

Advanced Smile Care

We sure missed you! We are now permitted to see you at Advanced Smile Care for any dental need including hygiene visits.

We used the last two months to enhance our safety measures and our infection control. We want to assure you that our dental office is an extremely safe place, and so as we get back to full speed we will be initially seeing fewer patients each day than prior to the pandemic. We thank you for understanding our commitment to the safety of our patients and employees!

NEW SAFETY MEASURES AT ADVANCED SMILE CARE

- You will be emailed a series of forms about your current health that you will need to fill out prior to your visit.
- Call us when you arrive and wait in your car until we ask for you.
- No one may accompany you during your visit unless you have a disability and require assistance.
- 100% social distancing at Advanced Smile Care.
- Please wear a face mask at all times in the office except during treatment. Please bring your mask with you to our office.
- We will take your temperature and give you an antiseptic rinse and hand sanitizer prior to treatment.
- Payments for all procedures should be resolved over the phone with our team prior to your visit so that your contact with us is limited to your treatment.
- Please reschedule your appointment if you have symptoms of cough, fever or shortness of breath. Please visit <https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html> to determine your level of risk to others.

Need to book an appointment? Call: **210-366-3606**

Please be safe out there,

Tony Thomas, DDS
